

ASSESSMENT. AS EASY AS ABC (WELL, A B C D E F).

How do you know how well the class is following a lesson?

Traditionally, you'd only find out some time later - when you have to analyze test results.

Now, from as little as 3 cents per child per day, our unique Activote® makes formative assessment fast - and very easy. And you will know exactly what your students are learning during the lesson.

It's a wire-free, hand held voting device - designed specifically to work with our Activboard®. We're the only company that produces interactive white boards with a built in receiver for the student response devices.

They are integrated by design. Integrated into our Activboard. Because we know that learning is two way communication. And integrated into our lesson development software. Both Activstudio® and Activprimary® have voting built right into the tool bar.

Ask a question - either planned into your lesson, or spontaneously...

The students click their answer - from under their desk if they want. (Our product testers insisted on radio, not infra-red, technology, so students could keep their answers private from each other if they wished.)

And teachers gain instant insight - on anything from who had breakfast to instant understanding of how well a lesson is comprehended.

Votes can be recorded by individual student or by the whole class - by one answer or a series of answers - all saveable to a flipchart or spreadsheet.

Teachers know who's clicked in. Literally.

ACTIVOTE®.

FORMATIVE ASSESSMENT FOR THE ACTIVCLASSROOM.

COMPLETE WITH

Wire-free technology 'Talks' seamlessly with our Activboard® with no awkward cables, external receivers or additional drivers.

Radio connectivity Works anywhere in the class. Unlike infra-red devices, no line of sight is needed.

Integrated Works seamlessly with our lesson development software, Activstudio® and Activprimary®.

User friendly design Durable, but easy to hold for small or big hands, with rubberized non-slip surface.

Tamper proof battery casing Designed to keep inquisitive fingers away from the batteries.

Torx screwdriver To let you change the batteries when you need to.

A hard body lockable carry case For easy storage and transportation of your voting kit.

Quick start guide To get you up and running.

Warranty 12 months.

Free extras Upgrades, support, online training, user forum and resource downloads from prometheanplanet.com.

CHOOSE FROM

Voting kits sets of 10 or 32 votes.

Free standards-aligned lessons with voting content available for download from prometheanplanet.com.

Training courses to suit your needs, including online, onsite and train-the-trainer packages.

AND ADD

[Take a look at the other parts of our Activclassroom™...](#)

Activprimary® Our unique interactive software, created specifically for young learners, features a lively interface and resources tailored to the elementary classroom.

Activboard® with Activstudio software® The foundation of the Activclassroom. Our Activboard features built-in RF communication to student peripherals; USB, Serial or Bluetooth connectivity right out of the box; and full mouse functionality with our exclusive battery-free Activpen. Activstudio lesson creation software includes thousands of ready-made lessons and resources for teachers to create their own dynamic classroom materials.

Activslate® Interact with the Activboard® with our wire-free 'mini-board', small enough and tough enough to pass around the class or allow the teacher the flexibility to move around the classroom while teaching.

Activtablet™ Connected to your computer, it acts just like a small Activboard®. Great for drawing, designing lessons or tracing where you need to use a pen away from the Activboard®.

Activsupport A range of professionally recognized training programs are available.

TECH SPEC

Description: No. of voting keys: 6 plus one registration key. Max. no of devices supported: 64. Battery life (typical): 2 years. Range: up to 50 feet. Overall size: 86 x 68 x 34mm (3.4" x 2.7" x 1.4"). Weight: 4.1oz. Packed weight (32 in a case): 18lbs. Battery technology: 3AAA Alkaline batteries replaceable via security screw. Throughput: 50 devices per second.
